

Recess and Physical Activity

Recess

The District will provide at least thirty minutes of recess for all elementary-school students each school day that exceeds five hours.

Recess must be supervised and student-directed. It must aim to be safe, inclusive, and high quality. To achieve those aims, schools will offer opportunities that align with state and national recess recommendations and maintain safe and age-appropriate equipment to use during recess. Schools may also include organized games as part of recess, but they should avoid including or permitting students to use computers, tablets, or phones during recess. Whenever possible, recess should be held outside. But if recess is held indoors, schools should use an appropriate space that promotes physical activity.

The District encourages recess to be scheduled before lunch whenever possible. Scheduling recess before lunch reduces food waste, maximizes nutrition, and allows students to be active before eating. If recess is offered before lunch, schools will place appropriate hand-washing facilities and/or hand-sanitizing mechanisms just inside or outside the cafeteria to ensure proper hygiene prior to eating. Students must use these mechanisms before eating. Hand-washing time, as well as time to put away coats/hats/gloves, will be built into the recess transition period/timeframe before students enter the cafeteria.

Quality Physical Education

Schools will implement a physical education program that includes instruction and practice in a variety of motor skills and movement patterns; knowledge of concepts, principles, strategies, and tactics related to movement and performance; knowledge and skills to achieve and maintain a health-enhancing level of physical activity and fitness; responsible personal and social behavior that respects self and others; and values physical activity for health, enjoyment, challenge, self-expression, and social interaction.

Physical Activity during the School Day

The district recognizes that students are more attentive and ready to learn if provided with periodic breaks when they can be physically active or stretch. Schools will encourage teachers to do the following:

- Incorporate movement and kinesthetic learning approaches into “core” subject instruction when possible (e.g., science, math, language arts, social studies and others) and do their part to limit sedentary behavior during the school day.
- Provide short (3-5-minute) physical activity breaks to students during and between classroom time. These physical activity breaks will complement, not substitute, for physical education class, recess, and class transition periods.

Schools cannot use physical activity during the school day as punishment. For example, a school can't have a student run laps or do push-ups as a form of punishment.

Active Transport

The District will identify safe and active routes to and from school to promote alternative transport methods for children, such as walking and bicycle programs. The District will encourage this behavior by engaging and promoting activities such as the following:

- Designation of safe or preferred routes to school;
- Promotional activities such as participation in International Walk to School Week, National Walk and Bike to School Week;
- Secure storage facilities for bicycles and helmets (e.g., shed, cage, fenced area);
- Instruction on walking/bicycling safety provided to students;
- Promotion of safe routes program to students, staff, and parents via newsletters, websites, local newspaper;
- Use of crossing guards;
- Ensuring crosswalks exist on streets leading to schools;
- Documentation of the number of children walking and/or biking to and from school; and
- Creation and distribution of maps of the school environment (e.g., sidewalks, crosswalks, roads, pathways, bike racks, etc.).

School District Facilities

Access to school sites will be provided through permitting use of facilities to community youth sports groups consistent with the district's facilities use policy.
